SUMMARY

Hi, I am Moiz Iqbal. I bring a passion for creating innovative and visually appealing websites that deliver outstanding user experiences. My expertise lies in front-end development, where I excel in HTML, CSS, and JavaScript, ensuring seamless integration of design and functionality. Additionally, I am proficient in utilizing modern frameworks and libraries such as React.

WORK EXPERIENCE

House Of Professionals (HOP) -- React JS Developer (3 Months)

April-2024

- Optimized React Components and Implemented responsive designs to enhance user experience.
- Fetch Data From API and show it to the Website.
- Handling Forms With Controlled And UnControlled Components.

Ape It Solution -- React JS Developer (Present)

November-2024

- I have developed multiple advanced travel agency websites using React, focusing on performance, scalability, and user experience. These projects included complex state management using Redux, efficient routing with React Router, and robust API integrations to fetch and display real-time travel packages, booking information, and destination data.
-

EDUCATION

Virtual University

Bachelor of Science in Information Technology.

May 2020 - April 2024

SKILLS

- **Languages:** HTML/CSS, JavaScript (ES6), Bootstrap, React.js, Next.js.
 - **Frameworks/Libraries:** React.js/Next.js, Bootstrap, Material UI, Rsuite, and Mantine.
 - **React Skills:** Functional Programming, State Management, Responsive Design, Api Integration.
 - **Developer Tools:** VS Code, GitHub.
 - **Context Api:** useContext Hook, Context Api.
 - **Redux:** Redux, React-Redux.
-

PROJECTS

React E-commerce Website: [Link](#)

Our React.js E-Commerce project features seamless navigation with React Router, Toastify notifications for user feedback, and dynamic data fetching for real-time product updates. Users can easily add products to their cart, proceed to checkout, and enjoy a smooth shopping experience.

Travel Agency Websites: [haramaynrooms.com](#), [alhijaztours.net](#)

I developed a travel agency website using React, implementing state management with Redux and seamless navigation with React Router. The project also involved integrating multiple APIs to fetch real-time travel data and booking details, enhancing user experience with dynamic content.

Ape It Solutions (Company Website) [Link](#)

- Implemented client-side routing with React Router for smooth navigation between Home, Services, About, and Contact pages.
- Built a responsive navigation menu with active link highlighting and seamless page transitions.
- Developed interactive UI components such as forms and buttons to enhance user experience and engagement.

Crud Application:

- Dynamic Data Management with State
- Reusable Components
- Fetching and Managing Data with Axios
